

Corporate Profile

REDEFINING POSSIBILITIES

Established in 2018, JIQ Manufacturing is a UK-based privately owned Original Equipment Manufacturer (OEM). We offer a wide range of flow control-related products, enabling our clients to meet or exceed their operational requirements and add value primarily in the Energy sector.

JIQ Manufacturing's mission is to become the global leader in flow control innovation. We can supply the highest-performing flow control equipment to our international clientele and meet their operational forecasts on schedule.

In an industry that has become increasingly stagnant, JIQ focuses on designing innovative equipment that meets industry standards whilst utilizing the highest specification of materials.

We aim to provide an unrivalled customer satisfaction experience by ensuring that our products and support offerings are available whenever and wherever they are needed.

Quality, Health, Safety and Environment (QHSE) Systems

At JIQM, we are committed to providing best-in-class products and services in accordance with our customers' requirements, along with a commitment to continuous improvement.

We accomplish this through our focus on the evolving needs of our customers, through consistent compliance with ISO 9001:2015 & BVUK-MSA-006, along with adhering to all relevant statutory and regulatory requirements.

Corporate Profile

REDEFINING POSSIBILITIES

Flow Control Products

JIQ has developed an extensive range of innovative high-pressure flow control products that safely transport fluids in various applications, including well testing, cementing, drilling, fracturing, and acidizing.

- **Innovation**
Flow rates (thru bore), “smart iron” concepts.
- **Operational**
Lightweight, High Pressure, High Temperature & Sour Rated as standard.
- **Quality**
Premium materials, traceability, QA/QC processes
- **Sustainability**
Equipment longevity = reduction in manufacturing, reduced weight = reduction in energy to transport, manufactured geographically close to operational area = reduction in logistics.

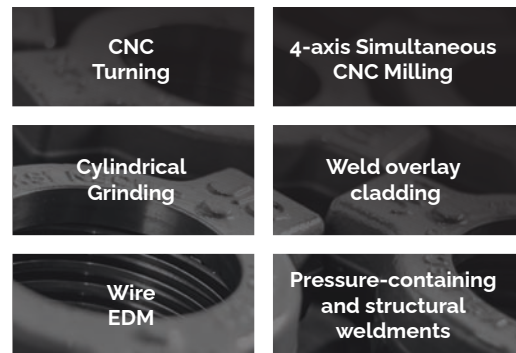

Research & Development

JIQ possesses a rare set of attributes for assisting our customers with their R&D challenges. As a one-stop shop for initial feasibility, in-house design, design analysis, prototype manufacture, and testing, we can rapidly produce results and assist in bringing innovative solutions to market.

Innovation and R&D are in our DNA. We strive to think beyond the industry’s norm and bring new ideas and technology to revolutionize flowline. With considerable professional engineering expertise from top side and subsea to downhole sectors, we’re well-placed to help our customers with their specific challenges or to bring new ideas into reality.

Subcontract Machining & Fabrication

We have an impressive manufacturing capability and expertise from our UK base in Aberdeenshire. Alongside the manufacture of JIQ products, we can offer sub-contract precision machining and manufacturing support services as listed below:

Competency Training & Certification

From our UK facility, JIQ can train and certify maintenance crews as competent to conduct the following on Flow Control Products:

- Preventative maintenance Levels I, II, III
- Corrective maintenance Levels I, II, III
- System Installation
- System testing

JIQ Product Listing

Lightweight Plug Valves – RFID Enabled / **Pressure Relief Valves – RFID Enabled** / Lightweight Dart Check Valves – RFID Enabled / **Tee Connections – RFID-Enabled** / Integral Crossovers – RFID Enabled / **Integral Flange Crossovers – RFID Enabled** / Lifting Caps – RFID Enabled / **Hammer Union Test Caps – RFID Enabled** / Fabricated Pipework – RFID Enabled / **Integral Pup Joints – RFID Enabled** / Hub Crossovers – RFID Enabled / **Choke Manifold – RFID Enabled** / Stinger Tool – RFID Enabled / **Seal Rings - PTFE Coated Xylan**
